PROFESSIONAL SUMMARY

Full Stack Developer who takes end-to-end ownership — from system design and database architecture to coding and deployment. Built and shipped complete applications independently, including real-time fintech systems during my internship at Bluestock. I don't just write code; I engineer solutions and see them through to production.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, TypeScript, HTML, CSS, Tailwind CSS

Backend: Node.js, Django, Flask, REST APIs

Databases: MySQL, MongoDB, PostgreSQL

Languages: JavaScript (ES6+), Python

Tools: Git, GitHub, Postman, Agile / Scrum

Currently Learning: System Design, AI/LLM Integrations, Docker

EXPERIENCE

Software Development Engineer Intern | Bluestock Fintech

Jun 2025 – Aug 2025

- ▶ Built an IPO web application using Node.js, REST APIs, and PostgreSQL that centralized real-time data for 1,000+ IPO records — improving query response time by 30%.
- ▶ Developed an ML-driven financial analysis pipeline in Python that processed 10,000+ data points and cut manual reporting time by 40%.
- ▶ Designed and documented RESTful APIs integrated with third-party financial data sources, improving data reliability by 25%.
- ▶ Independently owned the IPO data pipeline from design to deployment, collaborating with senior engineers in Agile sprints and code reviews.

PROJECTS

PersonaX – Social Profile Platform · [Live ↗](#) · [GitHub ↗](#)

Stack: Next.js, Node.js, Tailwind CSS, REST API

- ▶ Architected and shipped a full-stack social platform with modular Node.js REST APIs, tested at scale with 500+ user profiles.
- ▶ Built customizable dashboards and profile settings in Next.js + Tailwind CSS, achieving 99% uptime across staging environments.
- ▶ Designed clean API contracts enabling secure, scalable data exchange between frontend and backend services.

Yummy Yard – Food Ordering System · [Live ↗](#) · [GitHub ↗](#)

Stack: Django, MySQL, JavaScript, HTML, CSS

- ▶ Deployed a full-stack food ordering platform supporting 100+ concurrent orders, with secure authentication and real-time order tracking.
- ▶ Optimized Django ORM queries and MySQL indexing, reducing average API response latency by 20%.
- ▶ Implemented payment simulation and cart management, achieving 95% successful order completion in end-to-end testing.

Resume Builder Web App · [Live ↗](#) · [GitHub ↗](#)

Stack: React.js, Node.js, MongoDB, HTML, CSS

- ▶ Built a modular resume editor with dynamic form sections (profile, skills, education, experience), validated by 50+ test users.
- ▶ Introduced live-preview and PDF export features, reducing resume creation time by 70% compared to manual tools.

CERTIFICATIONS & ACHIEVEMENTS

Software Development Engineer Intern Certificate · Bluestock Fintech

Aug 2025

Hackathon Participation Certificate · GNIT

2024

Ideathon Participation Certificate · Anurag University

2025

- Presented an AI-driven drone prototype for disaster management at a national-level hackathon at Anurag University.

EDUCATION

B.Tech, Computer Science & Engineering

Expected: 2027

Guru Nanak Institute of Technology (GNIT), Hyderabad
